Glass Flooring and Treads

When it comes to dramatic design elements, it is difficult to imagine anything more dramatic in appearance than the selection of glass flooring. A stunning addition to any interior decor, our Jockimo glass treads/steps can serve as a beautiful and inspiring focal point. An exciting mix of style and function, glass flooring will definitely step up the level of style in your interior.

Featured on HGTV, ABC and Fine Living TV, Jockimo is the first company in the industry to conduct both UL and NFSI testing on its glass flooring products. GlassFrit™ and GlassGrit™ is UL classified in accordance with UL 410 standard for slip resistance of floor surface materials and is NFSI approved. We also offer an ADA (Americans with Disabilities Act) required contrasting strip on the nosing of stair treads.

WE CURRENTLY OFFER FOUR DIFFERENT ANTI-SLIP SOLUTIONS FOR GLASS FLOORING:

Our **GlassGrit™** anti-slip walking surface is the highest quality anti-slip product available. Our GlassGrit™ “beads” are permanently fused to the top surface of the glass in our state-of-the-art production process. GlassGrit™ will not fade or lose its anti-slip capabilities over time.

Our **GlassEtch™** products are developed entirely through an acid etching technique where portions of the glass surface are removed to varying depths. This controlled process delivers an attractive and durable anti-slip surface. The GlassEtch™ acid etched walking

surfaces serves a dual role – a safe walking surface and a modesty surface. The consistent acid-etched finish obscures the viewing through the glass while maintaining a high level of light transmittance.

Our **GlassFrit™** products are made via silk screening onto the glass, much like how a t-shirt is printed, and then baked onto the glass.

Our **GlassSculpt™** products...

MODESTY

When specifying a glass-flooring product designers should review the privacy aspects of the installation. In public applications an obscure product should be used so that improprieties do not occur. This obscure product should still allow for light to pass through the glass. Jockimo offers both transparent and translucent options to fit most every project requirement.

MONOLITHICALLY POLISHED EDGES.

Jockimo is the only glass flooring manufacturer that offers a monolithically polished edge on their fully tempered glass stair treads and flooring after laminating. Others may offer polishing but their glass is annealed and in our opinion, not as safe as fully tempered glass.

SCRATCH RESISTANT WALKING SURFACE

Jockimo is the first and only manufacturer to offer a permanent scratch resistant coating on the walking surface of their glass flooring.
